-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 112

Claims 1-7 and 9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, line 11, "two end edges" does not provide proper antecedent basis for the later recitation (lines 12-13) of "the two *first* end edges".

In claim 9, it appears that the second front corner post and second rear corner post are being recited for the first time. However, they have been introduced in claim 8, from which claim 9 depends.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1,2 and 4-7 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Ludwig.

See Figs. 6 and 7. The "corners" are where panels 113,114,116,118, meet. The rails are met by the corrugations in the panels, as clearly seen in Fig. 7. Regarding claim 5, a flat portion such as 130,132, reads on a "crossbar".

Claims 8-14 are rejected under 35 U.S.C. 102(a) as being clearly anticipated by Anderson et al.

Art Unit: 3634

See Figs. 1,14a and 14b. See side walls defined by frame members of 22,24, and elements 28,30, first front corner post and first rear corner post (frame members 22,24), and rails 28. See Figs. 14a,b, which shows several angled rails on only one of the two rails on each side. Consequently, multiple rails with an intermediate rail being a "middle" rail are present. See also the crossbar, met by another frame member of elements 22 or 24.

Response to Arguments

Applicant's arguments have been considered but are moot in view of the new ground(s) of rejection. This action is not made final.

Conclusion

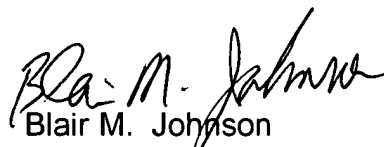

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
